CODIPRO LAUNCHES A NEW SWIVEL LIFTING RING: THE QLR

CODIPRO, the Luxembourgish specialist for swivel lifting rings, presents its new arrival in its range of swivel lifting rings: the QLR (Quick Lift Ring).

The QLR is a swivel lifting ring that allows particularly fast anchoring. At the push of a button, it can be fixed in the threaded hole in a matter of seconds.

“The idea of this lifting ring was born from the wish often expressed by our distributor-partners to be able to offer their customers a lifting ring that combines speed and safety”, explains Martin Poth, Sales Manager at CODIPRO. CODIPRO’s engineering department is constantly following new market trends and is developing the company’s product range. This is how the Quick Lift Ring, with all its advantages, came into being.

The QLR saves up to 80% time compared to screwing in a conventional lifting ring. This turns the sometimes lengthy screwing process into a short operation. It is a double swivel ring and is easy to handle. The system works purely mechanically and thus requires no complex maintenance. The Quick Lift Ring has higher lifting capacities than the fixed rings and is available for the DSR Gradup and stainless steel model.

CODIPRO designs and manufactures high quality articulated swivel lifting rings. Since its takeover in 2004 by the shareholders of NO-NAIL BOXES and its move to Wiltz (Luxembourg), CODIPRO has been growing steadily. Certified ISO 9001, ISO 14001, ISO 27001 and SRC, patented and in compliance with the most stringent safety standards, CODIPRO is part of the lifting division of the ALIPA Group, the Luxembourgish packaging and industrial lifting specialist with approximately 150 employees.
