TOOL FOR SHARING COLLECTIVE AGREEMENTS

For several years, FEDIL has been offering a tool to its member companies for sharing their collective agreements. The tool gives access to collective agreements recently concluded in other member companies. This access could be a valuable tool to better meet the challenge of future negotiations. Whether you are dealing with very specific topics or are interested in the general trends, these documents can usefully serve as a reference and source of information.

The collective agreements are in a secure SharePoint project group that is only **accessible to companies that have already exchanged their respective collective agreement**. The tool allows to consult the collective agreements of other members who have done the same.

The project group currently provides access to more than 30 collective agreements, which we expect to grow with broader participation from member companies.

Companies wishing to benefit from this service are requested to send a copy of their collective agreement and [this document](#) (filled-out) to [Mrs Linden](#).

In exchange, you will receive an email with a link to the new SharePoint project group.

[Mr Kieffer](#) and [Mr Heck](#) are at your disposal for further information.
