In **Luxembourg**, **Sopra Steria Group** represents more than 250 employees and three complementary entities:

- **Sopra Steria PSF** (a merger between Sopra Luxembourg and Steria PSF Luxembourg) who will be able to contribute with its expertise to provide digital services in the following areas: Consulting, Information Systems and IT Infrastructure.
- **Sopra Banking Software PSF** which is the specialized entity for banking software.
- **Sopra HR Software** which is specialized in publishing Human Resources management solutions.

INTERNSHIPS:

Java Developer:

As Junior Java Software Engineer trainee, you will be integrated to the software development department which works on various projects within the public and the private sector. You will have to design, develop and maintain software for the JEE platform using specifications. You take part in the development of the technical specifications. You will carry out unit and integration tests. You have a practical knowledge of Java, J2EE, JSP, SQL programming.

Web Developer:

Within the Organization Team you will ensure a corrective and ongoing maintenance, incident management. You will develop applications/modules according to the detailed specifications. On top of that, you will make technical and data analysis. Technical environment: AngularJS, Javascript, Web services, HTML5, CSS, Eclipse, SVN, Liferay.

Windows System Engineer:

This list isn't exhaustive and the internship will not cover all subjects but the objective is to create a healthy mix of different subjects that would help building a perspective on how a present day outsourcing and services company does things. On top of that it would be a first (or a more in depth) contact with ITIL, virtualisation and the different management aspects of a Windows environment.

Test Engineer:

Within the Testing Team you will design, create and maintain test cases and test scenarios based on the business requirements and in line with the project's test strategy. You will focus mainly on non-functional testing activities and integration tests automation, to ensure that applications are in line with the expectations and customer requirements.

.Net Developer

As Junior .NET Software Engineer trainee, you will be integrated in a dynamic team that every day provides to these customers its expertise in Microsoft technologies (.NET, C#, Biztalk, sharepoint) either through internal projects, or through external projects directly for Microsoft for example.
