

Front-end Developer Javascript

We are currently expanding our development team by **several front-end engineers**.

*Are you interested in **Web technologies**, in search technology, in mass-data analysis or machine learning? Do you like to code in JavaScript/TypeScript using open-source software? Do you want to join one of the fastest-growing and most innovative IT companies in Luxembourg?*

As a member of our Talkwalker Front-End Development Team, you will:

- Build, develop and refine our core Talkwalker Analytics product
- Participate in continuous R&D work for our Talkwalker platform
- Let your work be seen by more than 600 paying clients and more than 100.000 free users
- Be able to influence business and product delivery in a flexible company structure
- Work together with Data, the search and the machine learning team

We are looking for you:

- You are a strong front-end coder. Regardless of which frameworks you use or how you learned them, we're looking for people who can write clean, effective code. You should already have proficiency in JavaScript/TypeScript and an understanding of how web technologies work
- You are passionate about building user interfaces that enable users to solve their problems
- Familiarity with data structures, front-end frameworks, and other technical tools
- Understanding of how technical decisions impact the user of what you're building
- Skill and comfort working in a rapidly changing environment with dynamic objectives
- Demonstrated ability to continuously learn, work independently, and make decisions with minimal supervision. You have fun and experience in programming complex software technologies

What we offer:

- Outstanding development team and great company atmosphere where you can personally grow
- Monthly developer talks
- Yearly paid attendance to a conference of your choice related to your work. (e.g. Elasticon in San Francisco)
- Competitive salary package, flexible hours
- Additional benefits: free drinks, meal vouchers, weekly company lunches/drinks, monthly events (laser game, ice skating, ...)
- VISA sponsorship for successful candidates if required

Technologies which we use:

- Typescript and React are central to our front-end development, still angularjs is part in our code base
- A combination of open-source and internal technologies that suit the problems at hand
- Industry-standard build tooling, including Gradle, Grunt and Github

About us:

Talkwalker is a listening and analytics company that empowers over 1,000 brands and agencies to optimize the impact of their communication efforts. The company provides businesses with an easy-to-use platform to protect, measure and promote their brands worldwide, across all communication channels. Talkwalker's state-of-the-art social media analytics platform monitors and analyzes online conversations on social networks, news websites, blogs and forums in 187 languages. The company is headquartered in Luxembourg and has offices in New York City, San Francisco, and Frankfurt. For more information, please visit www.talkwalker.com.
