Senior Analyst Database Management
https://careers.peopleclick.eu.com/careerscp/client_cargolux/external/gateway/viewFromLink.html?jobPostId=734&localeCode=en-us

Task Responsibilities:

The successful candidate will join a team of experienced professionals and young talents in an Azure managed Cloud environment.

Our Business Intelligence and Master Data management team is searching to reinforce its support of MS SQL databases design and supervision. We run MS SQL server 2017 and Oracle 12 servers in Azure via external support company.

The database administrator will be in charge to monitor, assist and optimise our multiple databases instances. In collaboration with our external service provider team he/she will search to:

1. Design and optimise data management for our various applications
2. Upgrade the databases' versions throughout the company when applicable. This upgrade need coordination with application owners.
3. Enhance our database solutions in a Cloud environment, monitor backups and performances
4. Prepare and execute backup and recovery exercises with our Product Managers

Essential Requirements:

Database Administrator Qualifications/Skills:
- Strong command of SQL and SQL server tools
- Impeccable attention to detail and logical analytical skills in multi-systems environments, good analytical problem-solving skills
- Advanced knowledge of database security, performance monitoring and enhancements
- Familiarity with SSAS, SSIS, SSRS
- PowerShell and Unix shell scripting skills
- Understanding of relational and dimensional data modeling

Education and Work experience:
- Bachelor's degree in computer science or in any other related field, master is considered as an advantage
- Fluency in written and spoken English, other languages are a distinct advantage
- 1-3 years of experience in database administration, information technology, database architecture, master data management or a related field
- Extensive experience with database & ETL technologies (MySQL, SSIS, MS SQL, Oracle)
- MCSE/MCSA certifications preferred
- Experience with cloud services (Microsoft Azure, AWS) is a clear plus
- Experience with ETL solutions (Azure Data Factory, SSIS, IBM DataStage) is a plus
- Fluent in English, any other languagues will be as an advantage

Working Conditions:

- Position based in Luxembourg
- A certificate of good conduct (Casier judiciaire, Polizeiliches Führungszeugnis) will be required in case of positive selection
- Occasional travel required within the entire Cargolux network
